DYNAMO | Payment Editions
Solutions for Professionals

The perfect solution for Microsoft Dynamics NAV

Now also available for Swiss payments:

Complete functionality for CH national /SEPA-CH

Permanent transparency, secure processes, data protection – those are THE catchphrases in payment and bank management. Clear liquidity flows, payment processing for Germany, Switzerland and Austria, automated debit memo procedure: DYNAMO gives your the perfect solution – completely integrated, no extensive set-up, and always up to date.

At a glance:

- **Completely integrated enhancements for standard functions**
- **Editions have differentiated scopes of functions – companies of all sizes will find what they need**
- **Regular product updates - use current payment formats**
- **Intuitive use facilitates seamless introduction**

AKQUINET develops functional enhancements for Microsoft Dynamics NAV under the product name **DYNAMO**.

Our years of experience and continual contact with our partners at Dynamics NAV in Germany and Europe make it possible for us to develop high-quality ISV solutions. They can be used in many sectors and are oriented towards users' needs.

OUR **DYNAMO** products are the perfect addition to YOUR Microsoft Dynamics NAV ERP solution.

DYNAMO | Payment Editions

You can easily make electronic payments domestically and abroad, create time-optimized direct debit proposals and collections, seamlessly distribute payment flows to various bank accounts, and automatically process incoming advice notes and account statements – let **DYNAMO** solutions help you take care of your daily business.

Available for Microsoft Dynamics NAV 2016 and higher.

We continually extend and further develop the scope of services of our products by adding new ideas and addressing our users' and partners' requirements. Our close cooperation with Microsoft guarantees our solutions remain up to date.

We designed all of our **DYNAMO** products specifically for Microsoft Dynamics NAV technology. The manufacturer **certifies** them for the version in question.

Intuitive, secure, and transparent.

The right solution for all company sizes: **DYNAMO | Payment Editions**

STANDARD

- Transfers / check payments for customers & vendors
- Integrated reporting
- Complete mandate management
- Complete direct withdrawal processing, incl. charge backs
- SEPA file creation
- Bank statement processing (camt.053/054 and MT940)
- Enhanced clearing (cross-client)

The payment / direct withdrawal proposal shows you at a glance where you need to perform postprocessing: In addition to indicating incomplete or incorrect lines, the integrated traffic light function also displays items that, according to the filter criteria you selected, ought to be included in your file creation.

Individualize your clearing determination in account statement processing by adding to your criteria and prioritizing them if needed.
In multi-client operations, you can use the cross-client import function together with individual hit characteristics. You can also use the document search for several clients.

PROFESSIONAL

- Transfers to / from G/L accounts
- Distribution to banks
- Enhanced preview function
- Importing and processing incoming advice notes
- Workflow facilitates approval processes
- Archiving and archive search

Take advantage of being able to distribute your payment proposals to several selected bank accounts right before you create files. A detailed preview function helps you do this. You can use internal NAV workflows to map your approval processes. DYNAMO workflow templates let you simply and securely set up systems so multiple people can check processes.
You can easily include information from incoming advice notes when processing items: Minimize the amount of data you have to enter and speed up your account processing considerably once again.

ENTERPRISE

- Background processing of (mass) data
- Query processing
- Functional user authorization assignment
- Create and export files in the format MT101
- Use formats of different countries, e.g. Germany, Switzerland and Austria in one solution

Outsource processing requiring lots of time and energy from your everyday operations, or run your data processing in low-use time windows – use background processing to optimally exploit your existing infrastructure. Adjust the NAV user concept for the DYNAMO area to suit your needs by assigning authorizations at the functional level.

Extend the spectrum of usable file formats by adding the possibility to create data in ISO-**CH**/**SEPA-CH** or in MT101 format , which allows you to make transfers worldwide using the SWIFT network.

Building on the standards of Dynamics NAV, the **DYNAMO** team at AKQUINET creates integrated and certified solutions for finances, payment transactions, and card terminal connections.

You can integrate our products in many sectors individually, or you can combine them in your environment with little investment in the integration process.

Thanks to our partners, who have worked with us for many years, our modules have been licensed over 11,000 times in Germany and around the world.

Ask your partner or visit our website to find out more about integrating our products into your Microsoft Dynamics NAV solutions.
